19. ABSTRACT (Continue on reverse if necessary and identify by block number) This report presents detailed cost data for each of fourteen categories of Outpatient Nonavailability Statement (ONAS) CPT-4 procedures, grouped by inpatient and ambulatory professional services, performed within assigned and unassigned Army billable medical treatment facility catchment areas during the Third Quarter Fiscal Year (FY) 1994. Ambulatory professional services have the OCHAMPUS-assigned procedures associated with each category's facility-related charges listed in separate groupings. Appendix A summarizes by category of ONAS procedures and catchment area, the Third Quarter costs for amounts billed by the provider for ONAS services (ABS), amounts allowed for the services by the fiscal intermediary (AAS), payments made by the patient and other sources (TPP), total government payments for the services (TGP), percentages of TGP to ABS and to AAS, and of TPP to TGP. All claims for unassigned catchment areas are combined into one group and analyzed like a catchment area. Appendix B correspondingly shows the number of services and patient episodes, and averages of ABS, AAS, and TGP by service and by episode. Appendix C compares the unassigned and assigned catchment areas' inpatient, ambulatory, and total ONAS professional services totals over the Second and Third Quarters FY 1994. All appendices contain summaries combining data for all assigned and unassigned catchment areas.

Executive Summary

This report presents detailed cost data for each of fourteen categories of Outpatient Nonavailability Statement (ONAS) CPT-4 procedures, grouped by inpatient and ambulatory professional services, performed within assigned and unassigned Army billable medical treatment facility catchment areas during the Third Quarter Fiscal Year (FY) 1994. Ambulatory professional services also have the OCHAMPUS-assigned procedures associated with each category's facility-related charges listed in separate groupings. Appendix A (pp. A-1-109) summarizes by category of ONAS procedures and catchment area, the Third Quarter costs for amounts billed by the provider for ONAS services (ABS), amounts allowed for the services by the fiscal intermediary (AAS), payments made by the patient and other sources (TPP), total government payments for the services (TGP), percentages of TGP to ABS and to AAS, and of TPP to TGP. All claims for unassigned catchment areas are combined into one group and analyzed like a catchment area. Appendix B (pp. B-1-109) correspondingly shows the number of services and patient episodes, and averages of ABS, AAS, and TGP by service and by episode. Appendix C (pp. C-1-40) compares the unassigned and assigned catchment areas' inpatient, ambulatory, and total ONAS professional services totals over the Second and Third Quarters FY 1994. All appendices contain summaries combining data for all assigned and unassigned catchment areas.

Outpatient Nonavailability Statement professional services workload is presented by both services and episodes. Episodes were computed by sorting claims by patient identification number, treatment ending date, and procedure. All claims for a unique patient/date/procedure level were counted as being one episode. Using the patient per episode logic effectively controls for service billings where, when applicable, the technical and professional components are billed separately.

Total government payments for the claims, amounts billed and allowed for the ONAS services (ABS, AAS), number of services, number of episodes, and additionally the total amount allowed for the claims were then grouped and summed by billable medical treatment facility catchment area, by type of professional service (inpatient, ambulatory non-facility services, or ambulatory facility-related charges), and by ONAS category of procedures. Government payment for each category of ONAS procedures was estimated by aggregating within each group the sum of the total amount allowed for the service, the total amount allowed for the entire claims, and the total government payments for the claims. Each group's amount allowed for services was then divided by its amount allowed for claims. This ratio was multiplied by the category's sum of government payments for the claims, thus obtaining the total government payment for the category of ONAS services. Transactions having no government

cost, no patient cost, and no total amount allowed were deleted prior to summation, as well as those where the fiscal intermediary denied the claim.

Each ONAS procedure record in the Third Quarter's data was extracted from the TCSDP main database based upon a processing date during that quarter. Amounts in these tables may reflect an unstable condition due to part of a claim payment being processed outside the relevant quarter's processing date time interval (i.e., the Second Quarter FY 1994, or the Fourth Quarter FY 1994). Whenever possible, obvious unstable conditions were marked with an asterisk (*). Sometimes under these unstable conditions, some equations were not computed. In such cases, a decimal point (.) was used to fill space for answers not computed. Decimal point notation was also used to fill space when a variable had no data for a grouping. In addition, on several occasions the number of episodes for a procedure is greater than the number of services. This occurred when one of the services was an adjustment and no workload credit was given.

Along with costs and workload for inpatient and ambulatory professional services, related facility charges for each ONAS ambulatory professional services category are reported in Appendices A and B. These appendices summarize and segregate, for the unassigned and assigned catchment areas, all reported facility-related charges for each ONAS ambulatory surgery category for the Third Quarter. Appendix C however, which compares Second and Third Quarter FY 1994 inpatient and ambulatory professional services procedures costs, includes no facility-related charges (pp. C-1-40). Each ONAS ambulatory procedure category has an OCHAMPUS assigned CHAMPUS-unique procedure code used by fiscal intermediaries to collapse all facility-related charges submitted for each ONAS procedure within a category.

Thirty medical treatment facility catchment areas and the unassigned area were credited with some ONAS ambulatory facility-related charges during the Third Quarter of FY 1994 (pp. A-1-105, B-1-105), and in total, all fourteen ONAS categories showed activity of this kind (p. A-108-109, B-108-109). Eight catchment areas had no reported facility charge activity for the quarter, the same number of areas as the previous quarter. However, included as one of these eight is the new catchment area Carlisle Barracks, whose data was distinguished as a Health Services Command site in May 1994. Total government payments for all Third Quarter ambulatory facility-related charges were \$0.84 million, with ABS, AAS, and TPP at \$0.97, \$0.92, \$0.08 million respectively for a total of 2,433 services and 532 episodes (pp. A-108-109, B-108-109). The highest in government payments for any one ONAS category during the quarter was \$214,215 in the #64 Myringotomy/Tympanostomy category with \$231,578 in billings, \$221,861 allowed, \$7,646 paid by the patient and other sources, 620 services, and 169 patient episodes. The category with the

lowest total government cost for this type of charge was #73 Breast Mass/Tumor Excision at \$14,447, \$16,933 billed, \$17,425 allowed, \$2,978 paid by patient sources, 15 services and 13 episodes (pp. A-108-109, B-108-109). Average amounts billed per episode for an ONAS facility-related ambulatory category ranged from \$967 to \$3,081 during the quarter, while the corresponding average amounts allowed per episode for these two categories were \$941 to \$2,710, and average government payments per episode were \$777 to \$2,273 (pp. B-108-109). Note that all of the remaining statistics which follow in this Summary are applicable only to ONAS inpatient and ambulatory professional services procedure categories, exclusive of facility-related charges.

Professional claims submitted while the patient was either an inpatient at a hospital, or when a hospital submitted institutional billings for an ambulatory episode in conjunction with ONAS professional billings are services labeled Inpatient Professional Services in Appendices A-C. From Appendix C, TGP for all inpatient and ambulatory professional services procedures in a catchment area for the Third Quarter FY 1994 ranged from a low of \$2,029 to a high of \$199,239, with the corresponding ABS from \$6,620 to \$600,384, AAS from \$3,500 to \$316,458, TPP from \$3,492 to \$123,993, number of services from 9 to 1,088, and number of episodes from 11 to 930 (pp. C-39, C-29). Total government payments for all ONAS procedures, whether inpatient or ambulatory, in all catchment areas for the quarter were \$4.69 million, while ABS, AAS and TPP for the identical services/episodes were \$12.11, \$6.63 and \$3.05 million respectively (pp. C-40). The number of services for ONAS procedures in total across all assigned and unassigned catchment areas was 20,354 with 16,218 patient episodes (pp. C-40). In the Third Quarter, 26.6% of TGP for all ONAS professional services procedures, 22.0% of the corresponding number of services, and 24.0% of the episodes were for inpatient professional services (pp. C-40). System-wide, the professional services ABS per episode ranged from \$363.75 to \$1,878.50 for ambulatory professional services depending on the category of ONAS procedure (pp. B-107-108).

Total government payments rendered for ONAS inpatient and ambulatory professional services over all catchment areas for the Third Quarter ranged from only 31.1% to 59.6% of what was actually billed by the provider (pp. A-106-108). Again, the government paid from only 59.3% to 99.5% of the amount allowed by the fiscal intermediary, when examining all catchment areas as a whole. Some tables in Appendix A may compute TGP as being 100% of AAS and/or ABS. This condition usually occurs when the patient is treated on an inpatient basis and there is no co-pay. The differences between what the government actually paid and what was either allowed or billed were a result of disallowed charges, patient co-pays and deductibles, and coordination of benefits (other health insurance payments) which designated CHAMPUS as second payer. These "adjustments" to billed and allowed charges, as demonstrated above, are substantial.

Depending on the category of ONAS inpatient and ambulatory professional services, the total amount paid by patients and other sources (TPP) over all catchment areas ranged from 4.5% to 116.9% of the total amount paid by the government (pp. A-106-108). Correspondingly, for the two ONAS categories comprising the endpoints of the TPP to TGP range noted above, TPP varied from 2.7% to 38.3% of the amount billed by providers (ABS) and from 4.5% to 72.0% of the amount allowed by the fiscal intermediary (AAS) (pp. A-106-108).

Appendix C compares Second to Third Quarter FY 1994 summary totals by catchment area and type of professional service, and includes an analysis for the unassigned area (pp. C-1-39). A summary table combining the unassigned and all assigned catchment areas is also presented (p. C-40). This recapitulation table points out that inpatient professional services increased between the two quarters in all measures, with TGP raising 28.2%, ABS 33.1%, AAS 28.0%, TPP 30.4%, number of services 17.3%, and number of episodes 15.0%. Ambulatory professional services over all areas also exhibited across the board gains between quarters. Ambulatory professional services increased in TGP by 7.2%, ABS by 9.6%, AAS by 4.4%, TPP by 2.5%, number of services by 2.2%, and number of episodes by 7.5%. Between the Second and Third Quarters of FY 1994, combined inpatient and ambulatory ONAS professional services for all areas increased, with TGP raising by \$503,420 (12.0%), ABS by \$1,537,285 (14.5%), AAS by \$563,797 (9.3%), TPP by \$194,575 (6.8%), number of services by 996 (5.2%), and number of episodes by 1,364 (9.2%) (p. C-40).

Technical Note. The following TCSDP data were utilized for report:
